The first screenshot shows the 'CCP Monitoring Complete' page. It features a 'Start Date' field set to '21/05/2021' with a red arrow pointing to it, and a calendar icon. Below this is a list of Marts with columns for days of the week (F, S, S, M, T, W, T, F, S, S, M, T, W) and read counts. A blue link 'View Incomplete Lots' is visible.

The second screenshot shows a detailed view of a selected Mart (Boswells). It displays a calendar for the selected date (2021-05-24) and a table of read counts for each day. A red arrow points to the 'Boswells' link in the list, and another red arrow points to the '922' read count for the selected date. A blue box highlights 'Read Rate: 95%'.

The third screenshot shows a detailed view of a selected Mart (Boswells) with a table of read counts for each day. A blue box highlights 'Read Rate: 95%' and 'Date: 2021-05-24'.

- In the example in the first image, Marts has been selected. To set the date, click on the box next to Start Date, as shown by the red arrow and select the date from the calendar. You can view 13 days at a time. The days of the week are shown along the top. The same procedure is followed if you wish to view Abattoirs and Lairages.
- The Marts are listed vertically in alphabetical order and any reads for these Marts on the selected date, will appear further along the row in either an orange or green box. Hold your cursor over the chosen box(es) to view the details (see second image).
- To view Incomplete Lots, click on the blue link, shown in the first image. The third image shows you a table with Incomplete Lots. It will usually show a 0% Read Rate.
